

ADDRESSING THE PANDEMIC: TARGETING MISINFORMATION AND BIASES

Nancy Cunha, Julia Schelhorn, CJ Talerico, Oleksandr Korotkyi, Jonathan Benowitz

Purpose

To target the misinformation surrounding the current COVID-19 pandemic, by educating our audience on myths and facts about the disease and how it spreads.

Actions We Have Taken/ Are Taking

- Creating posters and infographics designed for spreading awareness on the issue.
- Using social media to inform the masses (@covidssafetytechniques on Instagram).
- Hosting a Zoom webinar in order to educate our audience on the myths and facts relating to COVID-19.

Our Call to Action

(We hope our audience members take these steps in order to support our group)

- Take the time to question the credibility of the information surrounding COVID-19 and the vaccine that they live by now.
- Conduct research on news sources, and from here on out surround themselves by the most credit, up-to-date, and accurate outlets.
- Make others aware of what they have learned about the spread of false info and ways to get reliable updates about COVID-19, its variants, and the vaccine.
